The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). DETAILED ACTION

Response to Arguments

Applicant's arguments filed 11/30/2005 have been fully considered but they are not persuasive.

Regarding applicant's assertion that the prior art of record does not address the problem of preventing a pealing of a dielectric layer and therefore does not anticipate the claimed invention, the examiner respectfully disagrees. The combination cited by the examiner is reasonable given the motivation cited by the examiner, which need not match the stated problem. Further the structure of the claimed device is met by the cited combination of prior art.

Regarding applicant's assertion that the layer 27-1 of the prior art is not a dielectric layer, the examiner respectfully disagrees. The dielectric property of the layer is established by its composition, TiO₂, and method of manufacture and as such is a dielectric layer in this example.

Proposed changes to the claims would further limit the scope and would require additional search and examination.
